COMPANY INFORMATION

Mail Boss® by Epoch Design, LLC offers locking security mailboxes of superior quality and value. The Mail Boss locking security mailbox product line secures sensitive mail, helping consumers protect themselves from the epidemic of mail theft and identity theft.

Company History

For over ten years, Epoch Design, LLC has produced solid wood and metal furniture, creating an extensive line of high quality adult and children's bedroom collections. When Epoch Design President David Bolles had his mail stolen two times in as many months in 2005, he set out to purchase a locking mailbox to protect his family and company from mail and identity theft. Unfortunately (or fortunately, as fate would have it) he was unable to find an affordable high-quality locking mailbox with true security at any of the local hardware stores or online stores he visited. He realized there was a need for a truly secure mailbox product, and with the resources of his company, set out to design the Mail Boss.

In 2006, Epoch Design introduced the Mail Boss locking mailbox, offering a truly secure and affordable solution to mail and identity theft prevention. With welded commercial-grade galvanized steel construction, the patented installation-friendly Fast-Trak® mounting plate, and the patented security lock design feature, the Mail Boss quickly won over consumers looking to prevent mail and identity theft from ruining their good names. The Mail Boss is now available in retail hardware stores across the nation. Over the years Mail Boss has expanded to include several curbside and wall mount models and mounting accessories.

Quality

All of the Mail Boss mailboxes and accessories are constructed of heavy gauge electro-galvanized steel and feature heavy-duty stainless steel hinges for years of trouble-free operation. All products are individually powder coated for superior durability and rust resistance. All products come with the hardware necessary making installation quick and easy.

Security

Epoch Design exceeds USPS standards for security and durability. Mail Boss mailboxes feature a patented anti-pry latch locking mechanism and a superior commercial grade lock making the Mail Boss mailboxes the ultimate in mail identity theft prevention. In addition, the Package Master features patented Mail-Shield® technology to prevent fishing.

Warranty

Epoch Design stands by the quality of our designs with a Limited Lifetime Warranty on all Mail Boss products. With over a decade in manufacturing experience, strict quality controls and superior materials ensure that every Epoch Design Mail Boss product is quality-built to the highest standards in the industry. When you choose an Epoch Design product you are getting the ultimate in innovation, security and long-lasting design.

Distinctive style and unsurpassed quality have made Mail Boss mailboxes by Epoch Design an innovative leader in the design and manufacturing of premium security locking mailboxes.
